SUMMARY

Backend Developer and AI/ML Engineer with 1.5+ years of experience delivering production backend systems, REST APIs, Python automation tools, and end-to-end machine learning pipelines. Proficient in Python, Flask, C#/.NET, scikit-learn, and MySQL. Driven to build intelligent, scalable, and reliable software. Targeting roles in **Backend Development**, **AI/ML Engineering**, and **Python Automation**.

TECHNICAL SKILLS

Languages: Python, C#, Java, Dart, SQL

Backend & APIs: Flask, C#/.NET, Spring Boot, REST APIs

Machine Learning: scikit-learn, pandas, NumPy, Matplotlib, Seaborn, TensorFlow Lite, joblib

Databases: MySQL, MongoDB, Firebase Firestore, Supabase (PostgreSQL)

Automation: psutil, hashlib, zipfile, smtplib, schedule, os, shutil

Tools: Git, GitHub, Linux, Jupyter, VS Code, Render, Firebase, Cloudinary, Agile

EXPERIENCE

Software Developer — Backend & Automation Systems

May 2023 – Oct 2024

Paveway Automation Pvt. Ltd.

Pune, India

- Developed C#/.NET backend applications for real-time industrial data collection and machine monitoring across automated assembly lines for clients including Tata, Mahindra, and Emerson.
- Designed and optimized MySQL database schemas and stored procedures to handle high-frequency machine logs, analytics, and traceability reporting pipelines.
- Implemented business logic and validation modules for production-critical automation workflows, ensuring zero-downtime system reliability.
- Diagnosed and resolved production issues through root cause analysis, improving system stability across client deployments.

PROJECTS

Realeye — AI Interview Preparation Platform | Flask, Spring Boot, Flutter, Supabase, Firebase, Render

[GitHub](#)

- Architected a multi-service backend decoupling interview logic (Flask) from content modules (Spring Boot) for scalability.
- Developed REST APIs for authentication, session management, and structured interview evaluation using Firebase and Supabase.
- Deployed production-ready services on Render with environment-based configuration and health monitoring.

Automated Platform Surveillance System | Python, psutil, smtplib, schedule

[GitHub](#)

- Developed a real-time monitor capturing CPU, RAM, disk, network I/O, thread counts, and open file handles per process.
- Automated structured timestamped log generation and email reports via Gmail SMTP SSL at configurable intervals.

Automated DataShield — Incremental Backup System | Python, hashlib, zipfile, smtplib, schedule

[GitHub](#)

- Designed an incremental backup engine leveraging MD5 hash comparison to identify and copy only modified files.
- Automated ZIP compression with timestamped archives, detailed log generation, and email delivery on a daily schedule.

Automated Disk Sanitizer | Python, hashlib, os, schedule

[GitHub](#)

- Built a duplicate file detection tool using MD5 checksum comparison with recursive directory scanning and safe deletion.
- Implemented daily scheduled execution with automatic structured log files capturing deletion history per run.

Machine Learning Case Studies — 5 Projects | scikit-learn, pandas, NumPy, Matplotlib, joblib

[GitHub](#)

- Delivered Decision Tree (Iris), KNN + hyperparameter tuning K=1–20 (Wine Quality), and Logistic Regression + joblib (Titanic).
- Built Multiple Linear Regression with MSE/RMSE/R² (Advertising) and K-Means + Elbow Method (Mall Segmentation).

EDUCATION

Master of Computer Applications (MCA)

Aug 2024 – 2026

Savitribai Phule Pune University | GPA: 8.40 / 10

Pune, India

Bachelor of Computer Applications (BCA)

Jun 2020 – Apr 2023

Swami Ramanand Teerth Marathwada University | GPA: 7.19 / 10

Maharashtra, India
